Khadi Visuals

Creative Content with AI

Learn to create images, video and your own character

8 lessons | 1 hour each | Live on Zoom | Taught in Azerbaijani | For everyone

From writing prompts to creating your own character and short videos: you will learn to create content with AI in a practical, step-by-step way.

Khadi Visuals

Lesson program

1

Introduction and prompt basics

Topic: A map of AI tools, legal and ethical rules (real people's faces, copyright, AI labels), prompt structure: subject, setting, style.

Practice: A first image and 3 different prompts.

2

Creating images

Topic: Creating images with a tool, working with a reference image, editing and refining.

Practice: An image in your own style from a reference.

3

Light, color and camera

Topic: Types of light, color and mood, shot sizes (wide, medium, close-up), angle, lens and depth, and how to write all of it in a prompt.

Practice: The same object: 2 different lights and 2 camera angles.

4

Creating your own character

Topic: Look, character and style, keeping the same character across different scenes.

Practice: 3 different scenes with your character.

5

Image to video and text to video

Topic: Motion prompts, rules for short clips, a script broken into shots and prompts.

Practice: Turning your character into a 5-second video.

6

Cartoon and realistic video

Topic: The difference between the two styles, how to work in each, building an episode.

Practice: The same scene: one cartoon, one realistic.

7

Editing real video with AI and montage

Topic: Changing backgrounds and objects, applying a style, joining clips, sound, formats (Reels, TikTok, YouTube), checking for AI mistakes.

Practice: Editing a real clip and preparing it for a format.

8

Final project and presentation

Topic: You choose your own format (cartoon character, AI influencer, product video or a social media series), presentation, feedback, building a portfolio and pitching to clients.

Practice: Presenting your final project.

Khadi Visuals

After the course

- You write clear and precise prompts
- You control an image with light and camera
- You create your own character
- You make short videos from images and text (cartoon or realistic)
- You edit real video with AI
- You start your own portfolio with the final project

Tools used

ChatGPT | Nano Banana | Veo 3 | Seedance | Omni Flash
